

The Heights Primary School

Key Stage Two Parent Planner: Summer 1 Week 5

Dear Parents/Carers,

This term our theme is: **Super Structures**

This week we will be:

English	This week will be a spelling, grammar and reading week. We will focus on comprehension skills and will also be assessing the children's learning and planning activities to target any issues that arise.
Mathematics	In maths we will also be assessing some of the skills we have taught this term. We will also be looking at strategies for doubling and halving (including odd numbers) as well as beginning to look at more formal written methods for multiplication. If your children know their times tables, ask them to find related facts. E.g If I know $3 \times 4 = 12$, then I know $30 \times 4 = 120$.
Topic	Following on from our visit to the Caversham and Reading Bridges last week we will be learning more about the history of Caversham and the importance the bridges played in the development of Caversham. We are also going to be painting our own structures using the photographs we took last week on our trips!

We can't believe it's the end of term again! This term has flown by and it feels strange that we are about to enter the final term in Year 3!

The weather is looking hot and sunny this week, so please ensure your child has sun cream applied, a full bottle of fresh water and a sun hat on the days when sunshine is forecast.

Please remember to bring recorders on Wednesday!

Best wishes,

Mrs Sanigar and Mrs Wells
